

REMARKS

Claims 11-30 are currently pending in the subject application and are presently under consideration. Claims 1-10 have been cancelled. Claims 11-30 have been added. A complete listing of claims is shown on pp. 3-8 of this Reply. In addition, the specification has been amended as indicated at page 2. It is respectfully submitted that no new matter has been entered through the amendments set forth herein.

Applicant's representative thanks Examiner Basichas for the courtesies extended during the telephonic interview conducted on September 8, 2010, during which objections and rejection under 35 U.S.C. §112, second paragraph, were discussed. Examiner Basichas indicated a new search will be conducted based on claims in the requested substitute specification of the instant application.

Favorable reconsideration of the subject patent application is respectfully requested in view of the comments and amendments herein.

I. Objection to Title

The title of instant application, which reads "HYBRID PHOTOVOLTAIC CONCENTRATING SYSTEM WITH CORRECTED TOTAL REFLECTORS FOR VERY LARGE CONCENTRATING RATIOS," is allegedly not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed. Reconsideration and withdrawal of this objection is respectfully requested in view of the substitute specification enclosed herein, in which the title has been amended to recite CORRECTED TOTAL REFLECTION REFLECTORS FOR SOLAR RADIATION CONCENTRATION SYSTEMS WITH LARGE CONCENTRATION RATIOS AND CORRECTED WAVE GUIDES WITH LOW TRANSMISSION LOSSES.

II. Objection to Abstract

The abstract of the disclosure is objected to because it appears to be a literal translation into English from a foreign document and is replete with grammatical and idiomatic errors. Reconsideration and withdrawal of this objection is respectfully requested in view of the amendments to the specification set forth herein.

III. Rejection of Claims 1-10 under 35 U.S.C §112

Claims 1-10 stand rejected over 35 U.S.C. §112, second paragraph. This rejection is now moot in view of the cancellation of the subject claims.

IV. New Claimed Subject Matter

Claims 11-30 have been added. It is respectfully submitted that the features recited in the subject claims satisfies the description requirement of 35 U.S.C. §112, second paragraph.

CONCLUSION

The present application is believed to be in condition for allowance in view of the above comments and amendments. A prompt action to such end is earnestly solicited.
